Taiga

Education

Hunter College,

New York, NY

Bachelor of Arts in Computer Science

Relevant Coursework

- Android App Development
- Data Structure and Algorithms

Experience

Software Developer, Mentored

AUG 2017 — PRESENT

- Built new platform with Ruby on Rails to reduce time to create whitelabel products for clients from hours to several minutes.
- Decrease code defects and bugs by incorporating TDD approach using Minitest for Ruby on Rails.
- Focus and support real time video and messaging features built on OpenTok and SocketIO on MEAN stack.
- Ensure software quality by leading team of 3 QA testers.

Web Developer, Omada Digital

MAR 2017 – JUN 2017

- Developed and published WordPress plugin that uses custom templates to transform affiliate content and increase call-to-action clicks.
- Delivered high quality products by ensuring responsive design, browser compatibility, and implementing fixes.

Projects

The Playlist

- Designed RESTful architecture for iTunes inspired playlist using YouTube API to deliver smooth music listening experience.

- Tech: React, Node/Express, Postgres

Food Around Me

- Utilized Yelp and Google Maps API to search dining options through HTML5 speech recognition API to transcribe user's speech to find nearby restaurants of their current location.

- Tech: Node/Express, EJS, Postgres
